

EIBAD HASSAN SHAH

BIM Architectural Engineer | 7 Years' Experience

Riyadh, Saudi Arabia | Pakistani

+966 55 054 7843 | ar.eibadshah@gmail.com

KSA Driving License — Valid | Transferable Iqama

Portfolio: <https://eibad.com>

PROFESSIONAL SUMMARY

BIM Architectural Engineer with 7 years of experience in architectural design, BIM coordination, technical documentation, and project delivery across Saudi Arabia and Pakistan. Experienced in developing architectural concepts, shop drawings, working drawings, 3D models, and complete technical drawing packages for residential, commercial, office, healthcare, and high-rise projects. Strong hands-on expertise in Autodesk Revit, Navisworks, AutoCAD, SketchUp, and architectural visualization tools, with practical experience in architectural-MEP coordination, regulatory compliance, site coordination, and technical issue resolution. Proven ability to work closely with clients, consultants, engineers, subcontractors, and project teams to deliver quality documentation, resolve technical challenges, and support timely project handovers.

PROFESSIONAL REGISTRATION

- Saudi Council of Engineers (SCE) — Registered
- Pakistan Council of Architects & Town Planners (PCATP) — Certified

CORE COMPETENCIES

- BIM & Architectural Coordination
- Architectural Design Development
- Technical Drawing & Documentation
- Architectural Shop Drawings
- MEP Coordination
- 3D Modeling & Visualization
- Construction Documentation
- Regulatory Code Compliance
- Saudi Building Code Compliance
- Project Delivery & Execution
- Site Coordination & Supervision
- Client & Consultant Coordination
- Design Review & Quality Control
- Material & Construction Methods
- Team Coordination & Management

KEY ACHIEVEMENTS

- Delivered and handed over technical drawings within or ahead of project deadlines across five KSA projects.
- Resolved major architectural-MEP clashes through BIM coordination, helping prevent site issues and rework.
- Proposed practical material alternatives and value-engineering solutions while maintaining required quality standards.
- Secured required permits and approvals from relevant Saudi authorities and local municipalities.
- Maintained compliance with the Saudi Building Code through regular site visits and coordination with project teams.
- Supported high-quality project handovers with minimal defects and snagging during final client inspections.
- Contributed to major Saudi projects, including the Riyadh Air Training Center (GACA) and Red Sea project works.

PROFESSIONAL EXPERIENCE

BIM Architectural Engineer

Youssef Marroun Contracting Co. | Riyadh, Saudi Arabia

January 2024 – Present

- Develop architectural shop drawings and detailed technical documentation using Autodesk Revit for construction and project delivery.
- Coordinate architectural designs with MEP services through BIM, identifying and resolving clashes before they affect site execution.
- Coordinate with consultants, subcontractors, and project teams to maintain drawing quality, resolve technical issues, and support project schedules.
- Ensure architectural drawings and site execution comply with applicable Saudi regulations and project requirements, including the Saudi Building Code.
- Conduct regular site visits to review architectural works, coordinate technical requirements, and support quality compliance.
- Identifying design discrepancies, clashes, and missing information and initiate RFIs and technical queries as required.
- Contribute to securing required project approvals and permits from relevant Saudi authorities and local municipalities.
- Propose practical material alternatives and value-engineering solutions while maintaining required quality and design intent.
- Complete and hand over technical drawings within or ahead of project deadlines, supporting timely project delivery.
- Supported the Riyadh Air Training Center (GACA) project and major Red Sea projects, including CTH, CDC, and QC-LAB, and many more projects like NUPCO, Mawten Block 02 and 30, Farm Frites Warehouses.
- Contributed to successful project handovers with minimal defects and snagging during final client inspections.

Architectural Engineer

Al Fouzan Trading & General Contracting Co. | Al Jouf, Saudi Arabia

Oct 2022 – September 2023

- Develop architectural shop drawings and detailed technical documentation using AutoCAD for construction and project delivery.
- Coordinate with consultants, subcontractors, and Engineers to maintain drawing quality, resolve technical issues, and support project schedules.
- Identifying design discrepancies, clashes, and missing information and initiate RFIs and technical queries as required.
- Complete and hand over technical drawings.
- Contributed to (AL-JOUF AIRPORT DEVELOPMENT PROJECT AT SAKAKA) project.

Senior Architect

Moderino Design & Build | Bahria Town-8, Rawalpindi, Pakistan

September 2021 – Aug 2022

- Led architectural design development for apartment, office, retail, healthcare, and interior-focused projects.
- Managed teams responsible for complete architectural drawings, working drawings, and MEP drawing packages.
- Reviewed project drawings for compliance with relevant regulatory authorities, codes, and standards.
- Presented design proposals to clients, gathered project requirements, and translated them into practical design solutions.
- Coordinated with clients, vendors, and project teams throughout the design and documentation process.
- Contributed to major completed projects including a 4-kanal residential block in Gulberg Greens, Islamabad, and The EVA commercial project on Morgah Road, Rawalpindi.

Architect

Castle Shepherd Gilmour | Bahria Town-7, Rawalpindi, Pakistan

December 2019 – September 2021

- Developed architectural concepts and design proposals for commercial, high-rise residential, and residential projects.
- Produced sketches and 3D models using SketchUp to develop and communicate design concepts.
- Prepared complete architectural, working, and MEP drawings in accordance with applicable codes and regulatory requirements.
- Met with clients to understand project requirements and translated their needs into documented design solutions.
- Delivered design presentations and supported client discussions throughout the design process.
- Conducted site visits and provided architectural supervision on assigned projects.

SELECTED PROJECTS

Riyadh Air Academy (GACA)

Riyadh, Saudi Arabia

- Ongoing project involvement as an Architectural Engineer, supporting architectural technical drawings, Coordination, and project documentation.

NUPCO — Al Jouf

Al Jouf, Saudi Arabia

- Contributed to the development and delivery of BIM architectural technical documentation and BIM-based coordination for major project works.

Red Sea Projects — CTH | CDC | QC-LAB

Red Sea, Saudi Arabia

- Contributed to the development and delivery of BIM architectural technical documentation and BIM-based coordination for major project works.

FARMHOUSE — 4-Kanal Residential Project

Gulberg Greens, Islamabad, Pakistan

- Architectural project with an approximate value of US\$250,000, involving design development, technical documentation, and coordination.

THE EVA — 2-Kanal Commercial Project

Morgah Road, Rawalpindi, Pakistan

- Commercial architectural project with an approximate value of US\$466,000, involving architectural design, documentation, and project coordination.

TECHNICAL SKILLS

- Autodesk Revit — BIM & Architectural Documentation
- Autodesk Navisworks — BIM Coordination & Clash Detection
- Autodesk Construction Cloud
- AutoCAD — Architectural & Technical Drawings
- SketchUp — 3D Modeling
- V-Ray — 3D Visualization & Rendering
- Adobe Photoshop — Rendering & Post-Production
- Lumion — Rendering & Animation
- Enscape — Architectural Visualization
- Microsoft Office — Word & PowerPoint

PROFESSIONAL WORKSHOPS ATTENDED

- Modes of Interpretation: Analyze, Translate and Transform — June 2015
- Building Materials: Its Applications in Architecture — April 2016
- Design Discovery Pakistan: Faculty Pavilion for Future Leisure Spaces — May 2016
- High Performance Buildings & Integrated Design Process — June 2016

EDUCATION

Bachelor of Architecture (B.Arch.)

University of Engineering and Technology (UET), Abbottabad, KPK, Pakistan

CGPA: 3.12/4.00
